BigPrint: Allows you to create 'to-size' printouts of any image on either a home printer or a large format printer. This feature is likely the only reason you would have to purchase the \$800 PRO version of SketchUp. While you're at <https://woodgears.ca>, look around. It is one of the finest woodworking sites on the internet.

My favorite SketchUp Books:

SketchUp Guide For Woodworkers – This is a great book with a lot of advanced techniques for woodworkers. Available at Rockler and other book stores.

SketchUp for Dummies – This book was written by one of the founders of SketchUp and has been the best resource for years. It is a general interest book that covers the basics as well as any book I've seen. Available at any book store.

Best site for SketchUp education: SketchUcation
